Dilute concentrate with clean water in spray bottle (750 ml) or bucket. Add 30 ml of product to make up a 750 ml diluted solution.

Clean surfaces before disinfection.

Apply to surface by spray, clean cloth or mop. Leave on surface for the required contact time. Wipe with a clean cloth and allow to air dry.

GENERAL CLEANING: For non-disinfection cleaning tasks.

Dilute 1:50 with clean water (100 ml per 5 L diluted solution). Mop or wipe surface.

Food contact surfaces must be thoroughly rinsed with potable water.

To prevent chemical build up, surfaces should be periodically washed. After use we recommend cloths/mops are rinsed in a fresh solution of Est-eem and allowed to air dry.

USE DISINFECTANTS SAFELY.

ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.

* Passes EN 16777 at 1:50. However, in order to also kill bacteria (EN 1276), we recommend a dilution of 1:25.
