

# PV-Pro®

## Ready-to-use liquid iodophor-based teat disinfectant

Highly effective sprayable PVP-Iodine technology. Protects skin by forming a barrier and provides long lasting protection.

Forms a protective barrier film on the skin which will remain in place for up to 12 hours.

Passes EN 1656. Kills a wide range of organisms in the presence of organic matter.

- Passes European disinfectant test method EN 1656.
- Contains 2950 ppm available Iodine and 10% Glycerol and Sorbitol.
- May be sprayed or dipped and gives excellent skin protection.
- Gives teat-end barrier protection between milkings.
- Ready-to-use, especially suitable for situations where measurement and mixing are likely to prove inconvenient.

#### DIRECTIONS FOR USE:

*For post-milking use only.* This product must be brought to a temperature above 20°C before use. Use undiluted. The use of a dosing pump for filling application equipment is recommended. Ensure udder and teats are clean and dry before using this product.

#### MANUAL DIPPING:

Fill teat cup approximately  $\frac{2}{3}$  full with product. Dip teats of every cow immediately after each has been milked, making sure that the full length of the teat is immersed. Top up with fresh solution as required. Empty and wash out teat dip cups after milking. To ensure sufficient contact time, care should be taken that the product is not removed after application (e.g. keep the cows standing for at least 5 minutes).

#### SPRAYING USING AN ELECTRONIC SPRAYER:

Immediately after milking spray the entire surface of each teat of every cow with product. Ensure the spray covers the entire surface of all teats. To ensure sufficient contact time, care should be taken that the product is not removed after application (e.g. keep the cows standing for at least 5 minutes).

After use, dispose of unused product, the packaging and any contaminated materials in accordance with local requirements. Used product can be flushed to the municipal sewer or disposed to the manure deposit depending on local requirements. Avoid release to an on-site wastewater treatment plant.
