

Trident

Sanitising powder

A specialised formulation for the manual cleaning and sanitising of stainless steel bulk milk tanks, dairy utensils and equipment.

Over 10,000ppm available chlorine to ensure adequate strength in high risk areas.

Free-flowing, non-abrasive blue powder, readily mixes into a paste.

- Contains a blend of detergents and chlorine releasing agents.
- Multi-purpose usage.
- Easy to use.
- Economical in use.

HAND CLEANING OF BULK MILK TANKS:

Immediately after tank is emptied, rinse tank surfaces with clean cold water to remove all milk residues. Sprinkle Trident onto the wet tank surfaces and underside of lids, working into a paste with a soft tank brush. Brush paste all over surfaces paying particular attention to paddle, bridge, underside of lids and the outlet. Remove dipstick and outlet cap and ensure they are thoroughly cleaned.

Wait for 5 minutes after completion of brushing, then rinse off with clean cold water. Replace dipstick and outlet cap ready for next milking.

HAND CLEANING OF DAIRY UTENSILS AND EQUIPMENT:

After rinsing with clean cold water, all items can be hand cleaned by sprinkling Trident over the utensils, brushing into a paste and covering all areas to be cleaned. Alternatively, a solution of Trident at the rate of 40 g per litre of water may be used.

Rinse thoroughly after use with clean cold water.
